PROFESSIONAL SUMMARY

Frontend developer building responsive web applications using **React and TypeScript** with a focus on clean component architecture and practical user interfaces.

Developed full-stack projects connecting React frontends with backend APIs and PostgreSQL databases. Currently working toward becoming a **full-stack developer**, expanding backend development skills with **Node.js and Express** to build complete end-to-end web applications.

Focused on writing maintainable code, designing practical systems, and continuously improving through real projects.

SELECTED PROJECTS

Full-Stack & Web Development Projects

Car Inventory Management System – Full Stack Vehicle Inventory Platform

Stack: React • TypeScript • FastAPI • PostgreSQL

Created a vehicle inventory management platform allowing users to manage car listings through a responsive React interface connected to a backend API and relational database.

- Built a React and TypeScript frontend for creating, updating, and managing vehicle listings
- Developed REST API endpoints using FastAPI for handling inventory operations
- Integrated PostgreSQL database for structured and persistent vehicle data storage
- Implemented complete CRUD functionality between frontend and backend services

GitHub (Frontend): <https://github.com/Kurtyyy597/car-inventory-frontend>

GitHub (Backend): <https://github.com/Kurtyyy597/car-inventory-backend>

Live Demo: <https://car-inventory-frontend-orcin.vercel.app/>

Ticket Management System – Frontend Issue Tracking Application

Stack: React • TypeScript • React Router

Developed a frontend ticket management system enabling users to create, manage, and track tickets with advanced UI features and workflow logic.

- Built a multi-page application using React Router with routes for ticket listing, creation, editing, dashboard, and detailed views
- Implemented advanced search with debouncing and fuzzy matching for efficient ticket lookup
- Developed filtering, sorting, and pagination for scalable ticket management
- Designed a dashboard with computed analytics including ticket metrics, status distribution, and workload insights

GitHub: <https://github.com/Kurtyyy597/ticket-management-system>

Live Demo: <https://ticket-management-system-ten.vercel.app/>

TaskFlow – Full Stack Task Management Website

Stack: React • TypeScript • FastAPI • PostgreSQL

Developed a full-stack task management system enabling users to create, organize, and manage tasks through a React interface connected to a REST API and PostgreSQL database.

- Built a responsive React frontend with dynamic state management for real-time task updates
- Developed RESTful API endpoints using FastAPI to handle task operations
- Integrated PostgreSQL database for persistent task storage
- Implemented full CRUD functionality between frontend and backend

GitHub (Frontend): <https://github.com/Kurtyyy597/TASKFLOW-FRONTEND>

GitHub (Backend): <https://github.com/Kurtyyy597/TASKFLOW-BACKEND>

Demo: <https://drive.google.com/file/d/1n0HC06UbhxOUbcl2jgg2wKSm8aIGLlel/view?usp=sharing>

AlphaLab Gym Website – Responsive Fitness Business Website

Stack: HTML • CSS • JavaScript

Designed and developed a responsive business website for a fitness gym showcasing services, pricing, and membership information.

- Built a responsive multi-section layout using semantic HTML5 and modern CSS3
- Implemented structured sections including hero banner, services overview, pricing tables, and call-to-action components

- Applied Flexbox and responsive design techniques to ensure compatibility across desktop, tablet, and mobile devices
- Developed smooth navigation and interactive UI elements using JavaScript

GitHub: <https://github.com/Kurtyyy597/ALPHALAB-WEBSITE>

Live Demo: <https://alphalab-website.vercel.app/>

Portfolio Website – Personal Developer Portfolio

Stack: HTML • CSS • JavaScript

Developed a responsive personal developer portfolio to present projects, technical skills, and development work.

- Built a fully responsive website using semantic HTML5 and modern CSS3 for clean structure and accessibility
- Designed a modern user interface using Flexbox layout and custom CSS animations
- Created structured project showcase sections linking to GitHub repositories, live demos, and video walkthroughs
- Focused on usability, visual hierarchy, and responsive design for optimal viewing across desktop, tablet, and mobile devices

GitHub: <https://github.com/Kurtyyy597/KURT---PORTFOLIO---WEBSITE>

Live Demo: <https://kurt-portfolio-website.vercel.app/>

Mobile Application Projects

Employee Management App – Mobile Employee Management System

Stack: React Native • TypeScript

Developed a mobile application for managing employee records through a structured CRUD workflow.

- Implemented full CRUD functionality for adding, updating, and deleting employee records
- Built the mobile interface using React Native and TypeScript for scalable component structure
- Integrated image upload functionality using Expo Image Picker
- Applied structured form validation for email format, salary inputs, and required fields

GitHub: <https://github.com/Kurtyyy597/CRUD-REACT-NATIVE>

Demo: https://drive.google.com/drive/folders/1OKCk61-yLzndEIMxt8-QNo_U2ph9FKO3

MiniShoppee – Mobile E-commerce Application

Stack: React Native • TypeScript

Developed a mobile e-commerce application enabling users to browse products and simulate purchase interactions.

- Built the mobile application using React Native and TypeScript for scalable and maintainable component architecture
- Implemented dynamic product browsing with real-time price updates and shipping fee toggles
- Developed interactive UI components including slide-up modals and animated loading indicators
- Focused on smooth user experience through responsive layouts and intuitive mobile interactions

GitHub: <https://github.com/Kurtyyy597/MINISHOPPEE-ECOMMERCE-PROJECT>

Demo: <https://drive.google.com/drive/folders/1eK8ysvRdR4qxnAw5L-qdtKlh5yObelAI>

Rolex E-Commerce App – Mobile Product Ordering Application

Stack: React Native • TypeScript

Created a mobile product ordering application allowing users to browse items and complete a simulated purchase workflow.

- Built the application using React Native and TypeScript for scalable and maintainable mobile architecture
- Implemented dynamic pricing logic including VAT, vouchers, and delivery fee calculations
- Developed a complete order workflow with product selection, validation, and receipt generation
- Added loading animations and structured UI feedback to enhance the user experience

GitHub: <https://github.com/Kurtyyy597/React-Native-E-Commerce-Mini-Rolex>

Demo: <https://drive.google.com/drive/folders/1eK8ysvRdR4qxnAw5L-qdtKlh5yObelAI>

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python

Frontend Development: React, React Native, HTML5, CSS3, Responsive Design

Backend Development: Node.js, Express.js

Databases: PostgreSQL

Tools & Platforms: Git, GitHub, VS Code, Expo, EAS Build, Vercel

Concepts: CRUD Systems, API Integration, Mobile-First Development, Component-Based Architecture

EDUCATION

Bachelor of Science in Information Technology

Universidad De Manila — Expected Graduation: July, 2026

Relevant Coursework:

Data Structures & Algorithms • Web Development • Mobile App Development • Software Engineering

WORK EXPERIENCE

Administrative Support Assistant (School Deployment)

DSWD Legarda | August–November 2024

- Organized and managed official documentation for operational programs
- Coordinated communication with beneficiaries for updates and program support
- Assisted administrative operations during school-partnered government initiatives
- Developed strong organization, documentation, and communication skills
