PROFESSIONAL SUMMARY

Frontend developer specializing in **React** and **TypeScript**, building responsive and production-ready web applications. I design clean UI architectures, implement dynamic data flows between frontend and backend systems, and deliver full-stack projects powered by **FastAPI** and **PostgreSQL**. Focused on writing maintainable code and shipping practical digital products.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python

Frontend Development: React, React Native, HTML5, CSS3, Responsive Design

Backend Development: FastAPI, REST API Development

Databases: PostgreSQL

Tools & Platforms: Git, GitHub, VS Code, Expo, EAS Build, Vercel

Concepts: CRUD Systems, API Integration, Mobile-First Development, Component-Based Architecture

SELECTED PROJECTS

Ticketing System – Issue Tracking Dashboard

React | TypeScript | Vite

Designed and developed a workflow-focused ticket management dashboard that simulates how internal engineering teams track issues, tasks, and feature requests.

Key Impact: Designed a multi-feature internal tool with filtering, activity tracking, subtasks, comments, and dashboard analytics to replicate real production ticketing workflows.

- Built a structured ticket lifecycle system supporting creation, editing, deletion, and restoration from deleted history

- Implemented advanced filtering and search across ticket title, description, assignee, reporter, tags, and ticket code
- Designed a dashboard with live metrics including resolution rate, overdue tickets, and priority distribution
- Developed collaboration-style features including subtasks, activity history logs, and ticket comments
- Implemented productivity-focused keyboard shortcuts and modal workflows for faster user interaction
- Persisted application state using localStorage to simulate real data persistence

GitHub: <https://github.com/Kurtyyy597/Ticketing-System-Project>

Live Demo: <https://ticketing-system-project-seven.vercel.app/>

TaskFlow – Full Stack Task Management Website

React | FastAPI | PostgreSQL

Designed and developed a full-stack task management website that allows users to organize and manage tasks through a responsive React interface and a FastAPI backend.

- Built a responsive React frontend with dynamic state management for real-time task updates
- Developed RESTful API endpoints using FastAPI to handle task operations
- Integrated PostgreSQL database for persistent task storage
- Implemented full CRUD functionality between frontend and backend

GitHub (Frontend): <https://github.com/Kurtyyy597/TASKFLOW-FRONTEND>

GitHub (Backend): <https://github.com/Kurtyyy597/TASKFLOW-BACKEND>

Demo: <https://drive.google.com/drive/folders/1rARC1puAt-zAtzyCozkV9mbi1ZbvhpqL>

Car Inventory Management System – Full Stack Vehicle Inventory Platform

React | TypeScript | Python API | PostgreSQL

Built a vehicle inventory platform allowing users to manage and organize car listings through a responsive React interface and structured backend API.

- Built a React and TypeScript frontend for creating, updating, and managing vehicle listings
- Developed RESTful API endpoints using Python for handling inventory operations
- Integrated PostgreSQL database for structured and persistent vehicle data storage
- Implemented complete CRUD functionality between frontend and backend services
- Added loading states, toast notifications, and structured error handling to improve user experience
- Deployed the frontend application on Vercel for production hosting

GitHub (Frontend): <https://github.com/Kurtyyy597/car-inventory-frontend>

GitHub (Backend): <https://github.com/Kurtyyy597/car-inventory-backend>

Live Demo: <https://car-inventory-frontend-orcin.vercel.app/>

AlphaLab Gym Website – Responsive Fitness Business Website

HTML | CSS | JavaScript

Designed and developed a responsive multi-section website for a fitness gym, showcasing services, pricing, and membership information through a modern and user-friendly interface.

- Built a responsive multi-section layout using semantic HTML5 and modern CSS3
- Implemented structured sections including hero banner, services overview, pricing tables, and call-to-action components
- Applied Flexbox and responsive design techniques to ensure compatibility across desktop, tablet, and mobile devices
- Developed smooth navigation and interactive UI elements using JavaScript
- Focused on clean layout structure, accessibility, and user-friendly visual hierarchy

GitHub: <https://github.com/Kurtyyy597/ALPHALAB-WEBSITE>

Live Demo: <https://alphalab-website.vercel.app/>

Portfolio Website – Personal Developer Portfolio

HTML | CSS | JavaScript

Designed and developed a responsive personal portfolio website to showcase web and mobile development projects, technical skills, and project demonstrations.

- Built a fully responsive website using semantic HTML5 and modern CSS3 for clean structure and accessibility
- Designed a modern user interface using Flexbox layout and custom CSS animations
- Created structured project showcase sections linking to GitHub repositories, live demos, and video walkthroughs
- Focused on usability, visual hierarchy, and responsive design for optimal viewing across desktop, tablet, and mobile devices
- Organized project presentations to highlight development work and technical capabilities for recruiters and collaborators

GitHub: <https://github.com/Kurtyyy597/KURT---PORTFOLIO---WEBSITE>

Live Demo: <https://kurt-portfolio-website.vercel.app/>

Employee Management App – Mobile Employee Management System

React Native | TypeScript

Designed and developed a mobile employee management application that allows users to create, update, and manage employee records through a structured and user-friendly mobile interface.

- Implemented full CRUD functionality for adding, updating, and deleting employee records
- Built the mobile interface using React Native and TypeScript for scalable component structure
- Integrated image upload functionality using Expo Image Picker
- Applied structured form validation for email format, salary inputs, and required fields
- Designed responsive mobile UI components for improved usability and data input flow

GitHub: <https://github.com/Kurtyyy597/CRUD-REACT-NATIVE>

Demo: https://drive.google.com/drive/folders/1OKCk61-yLzndEIMxt8-QNo_U2ph9FKO3

MiniShoppee – Mobile E-commerce Application

React Native | TypeScript

Designed and developed a mobile e-commerce application inspired by modern shopping platforms, allowing users to browse products and simulate purchasing interactions through a dynamic mobile interface.

- Built the mobile application using React Native and TypeScript for scalable and maintainable component architecture
- Implemented dynamic product browsing with real-time price updates and shipping fee toggles
- Developed interactive UI components including slide-up modals and animated loading indicators
- Focused on smooth user experience through responsive layouts and intuitive mobile interactions

GitHub: <https://github.com/Kurtyyy597/MINISHOPPEE-ECOMMERCE-PROJECT>

Demo: <https://drive.google.com/drive/folders/1eK8ysvRdR4qxnAw5L-qdtKlh5yObelAI>

Rolex E-Commerce App – Mobile Product Ordering Application

React Native | TypeScript

Designed and developed a mobile e-commerce application that allows users to browse products and complete an order workflow through an interactive mobile interface.

- Built the application using React Native and TypeScript for scalable and maintainable mobile architecture
- Implemented dynamic pricing logic including VAT, vouchers, and delivery fee calculations
- Developed a complete order workflow with product selection, validation, and receipt generation
- Implemented a light and dark theme system for improved user customization
- Added loading animations and structured UI feedback to enhance the user experience

GitHub: <https://github.com/Kurtyyy597/React-Native-E-Commerce-Mini-Rolux>

Demo: <https://drive.google.com/drive/folders/1eK8ysvRdR4qxnAw5L-qdtKlh5yObelAI>

EDUCATION

Bachelor of Science in Information Technology

Universidad De Manila — Expected Graduation: July, 2026

Relevant Coursework:

Data Structures & Algorithms • Web Development • Mobile App Development • Software Engineering

WORK EXPERIENCE

Administrative Support Assistant (School Deployment)

DSWD Legarda | August–November 2024

- Organized and managed official documentation for operational programs
- Coordinated communication with beneficiaries for updates and program support
- Assisted administrative operations during school-partnered government initiatives
- Developed strong organization, documentation, and communication skills
